Bar code
Unknown

Is the product counterfeit?
No

Is this notification linked to a Business Gateway case?

Case number
A12/00495/21

Type of risk
Chemical

Risk description (technical defect and consequences)

The product contains the aromatic amine o-toluidine (measured value: 28.6 mg/kg). When in direct and prolonged contact with the skin, o-toluidine may be absorbed by the skin. O-toluidine may cause cancer, is suspected of causing genetic defects and may cause skin irritation.

Legal provisions (at EU level) and European standards against which the product was tested and did not comply

The Council of Europe Resolution ResAP (2008)1 on requirements and criteria for the safety of tattoos and permanent make-up, recommends that aromatic amines with carcinogenic mutagenic, reprotoxic or sensitising properties should neither be present in tattoos and permanent make-up products nor released from azo-colourants.

(Overall) risk level
Serious
