

Alert number A12/00444/23

Product Tattoo ink

Risk type Chemical

The product has an excessive concentration of lead and has nickel (measured values: 1.7 mg/kg and 0.66 mg/kg, respectively). Lead is harmful to human health, accumulates in the body and may affect breast-fed or unborn children. The product is missing the precautionary statement "Contains nickel. Can cause allergic reactions.", which may lead to allergic responses in sensitized individuals.

The product does not comply with the REACH Regulation.

Category Chemical products

Type Consumer
