

THE CORONA VIRUS WILL NOT TAKE A VACATION!

Take care of yourself and stick to social distancing also during your vacation!

Take care of yourself.

For the benefit of your family, friends and colleagues!

Hygiene measures such as **washing your hands regularly** or **wearing mouth and nose protection masks** are also important during your vacation!

Think about the destinations for your vacation. In many countries the **situation around Corona is way more dangerous** and the **health systems** are not comparable to the high Austrian level!

If you are on holidays at a region with **safety phase 5 or 6** and **you fall ill or are put under quarantine you are not any longer entitled to obtain sickness benefit.** This means you will not receive a salary!

When returning to the company, **you should present a negative test!**

Stay safe!

The current safety phases can be found at:
