¹ the data of the WKO-employment statistics refer to enterprises within the range of the Economic Chambers and are the result of a complex transformation process of ÖNACE-based data into Chamber classification-based data; compared to social security statistics, which covers only enterprises with employees (employer establishments) the WKO-employment statistics (based on business register data) comprises also enterprises without employees; in this group of enterprises the number of entities increased significantly over the years due to changes in the inclusion criteria to the business register; the number of enterprises in the above statistics refers to "economically active" units and is not directly comparable with the number of "active" Chamber members in the Chamber member statistics shown in chapter 15; furthermore are changes in the criteria for the status "economically active" responsible for the fact that the results for different years are not comparable with each other, especially for enterprises without employees
