

## DO YOU SPEAK SUCCESS?

Language barriers still present real, often overlooked limits – especially in the global market. When companies rely on the linguistic expertise and intercultural competence of professionals, they open up valuable business opportunities.

## PROFESSIONAL COMMUNICATION PAYS OFF

Translation errors cost time and money; at best they can be embarrassing, at worst they can cause serious damage to a company's image and lose clients' trust.

Vienna's language service providers use their expertise to help you communicate successfully with your customers and business partners. As competent partners, their work guarantees that your messages are actually received as you intended – that they are professional, without errors and perfectly adapted to the cultural characteristics of your target group.

Take the opportunity to build trust with your customers and business partners. Because a common language unites – and also gives you the opportunity to stand out from the competition.

## LANGUAGE SERVICES

We speak of language services because you can expect more than just translation or interpreting from Vienna's language service providers. They will help you prepare your content and messages in a way that is appropriate to both the target group and the market and thus they will play a central role in your communication success (localisation).

Are you already leveraging the full potential of multilingualism and intercultural competences?

On the website of the Professional Group of Language Service Providers at the Vienna Chamber of Commerce you will find detailed information about our services.
